Section D – Risks

D.2	Key information on the key risks that are specific to the Issuer	<p>Credit risk: The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss where the downgrading of an entity's credit rating causes a fall in the value of the Issuer's investment in that entity's financial instruments.</p> <p>Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer's main business markets (being Europe and the United States) has been marked by generally weaker than expected growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the outcome of such an event and to accurately quantify the impact of such event on the Issuer's profitability, liquidity and capital. If some or all of these conditions persist or worsen, they may have a material adverse effect on the Issuer's operations, financial condition and prospects.</p> <p>Liquidity risk: The Issuer is exposed to the risk that it may be unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.</p> <p>Capital risk: The Issuer may be unable to maintain appropriate capital ratios, which could lead to: (i) an inability to support business activity; (ii) a failure to meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased regulatory capital requirements and changes to what constitutes capital may constrain the Issuer's planned activities and could increase costs and contribute to adverse impacts on the Issuer's earnings.</p> <p>Legal and regulatory-related risk: Non-compliance by the Issuer with applicable laws, regulations and codes relevant to the financial services industry could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal</p>
-----	---	---

		<p>of authorisations to operate.</p> <p>Reputation risk: Reputational damage reduces – directly or indirectly – the attractiveness of the Issuer to stakeholders and may lead to negative publicity, loss of revenue, litigation, regulatory or legislative action, loss of existing or potential client business, reduced workforce morale, and difficulties in recruiting talent. Sustained reputational damage could have a materially negative impact on the Issuer's licence to operate and the value of the Issuer's franchise which in turn could negatively affect the Issuer's profitability and financial condition.</p>
D.6	<p>Key information on the key risks that are specific to the Securities; including a risk warning that investors may lose some or all of the value of their investment</p>	<p>You may lose up to the entire value of your investment in the Securities:</p> <p>You will lose up to the entire value of your investment if the Issuer fails or is otherwise unable to meet its payment obligations.</p> <p>You may also lose the value of your entire investment, or part of it, if:</p> <ul style="list-style-type: none"> • the Underlying Assets perform in such a manner that the redemption amount payable to you (whether at maturity or following any early redemption) is less than the initial purchase price; • you sell your Securities prior to maturity in the secondary market (if any) at an amount that is less than the initial purchase price; • the Securities are redeemed early following the occurrence of an extraordinary event in relation to the Underlying Asset(s), the Issuer, the Issuer's hedging arrangement, the relevant currencies or taxation (such as following an additional disruption event) and the amount you receive on such redemption is less than the initial purchase price; and/or • the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to you and/or the value of the Securities is reduced. <p>Return linked to performance of Underlying Assets: The return payable on the Securities is linked to the change in value of the Underlying Asset over the life of the Securities. Any information about the past performance of any Underlying Asset should not be taken as an indication of how prices will change in the future. You will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of any Underlying Asset.</p> <p>Risk of withdrawal of the public offering: In case of a public offer, the Issuer may provide in the Final Terms that it is a condition of the offer that the Issuer may withdraw the offer for reasons beyond its control, such as extraordinary events that in the determination of the Issuer may be prejudicial to the offer. In such circumstances, the offer will be deemed to be null and void. In such case, where you have already paid or delivered subscription monies for the relevant Securities, you will be entitled to reimbursement of such amounts, but will not receive any remuneration that may have accrued in the period between their payment or delivery of subscription monies and the reimbursement of the Securities.</p> <p>Reinvestment risk/loss of yield: Following an early redemption of the Securities for any reason, holders may be unable to reinvest the redemption proceeds at a rate of return as high as the return on the Securities being redeemed.</p> <p>Worst-of: You are exposed to the performance of every Underlying Asset. Irrespective of how the other Underlying Assets perform, <i>if any one or more</i></p>

		<p>Underlying Assets fail to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you might receive no interest payments and/or could lose some or all of your initial investment.</p> <p>Volatile market prices: The market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p> <p>Equity Index risks: Securities linked to the performance of equity indices provide investment diversification opportunities, but will be subject to the risk of fluctuations in both equity prices and the value and volatility of the relevant equity index. Securities linked to equity indices may not participate in dividends or any other distributions paid on the shares which make up such indices, accordingly, you may receive a lower return on the Securities than you would have received if you had invested directly in those shares.</p> <p>The Index Sponsor can add, delete or substitute the components of an equity index at its discretion, and may also alter the methodology used to calculate the level of such index. These events may have a detrimental impact on the level of that index, which in turn could have a negative impact on the value of and return on the Securities.</p>
